exhausting

tiring

# encounters

casual or unplanned meeting

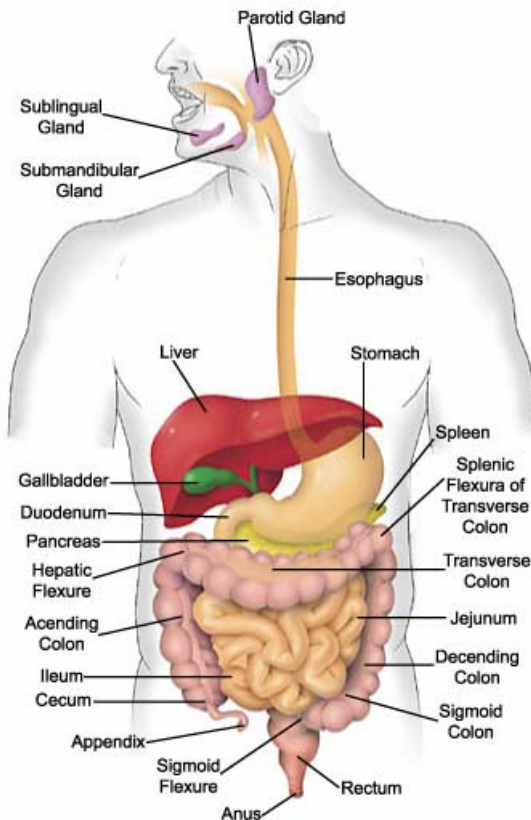

# reasonable

possessing sound judgment or  
thinking

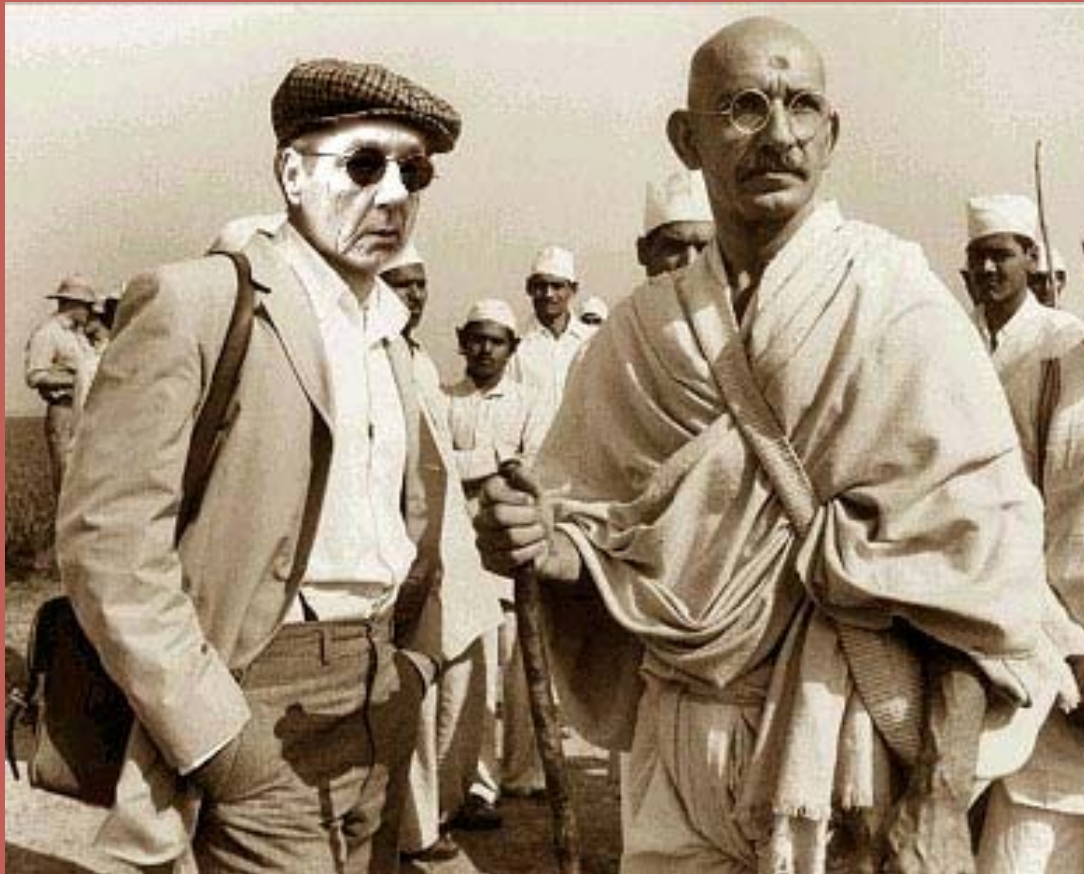

# digestion

the breakdown and absorption of food in the body

- Those rumblings and gurgling sounds are not really from your stomach being empty.
- The sounds are actually mushed-up food and gases moving through the intestines during digestion.
- It takes food seven seconds to go from the mouth to the stomach. You produce 1 to 3 pints of saliva every day.
- Listen to your teachers! If you swallow your gum by mistake, it will take 2 to 3 weeks to digest!

enlightened  
free from ignorance
